

Robotics Team Honored

During its regular meeting on May 10th, the Port Jefferson School District Board of Education recognized the Earl L. Vandermeulen Robotics Team for designing and constructing a complex robot over a six-week

period. During the recognition ceremony, team members provided a demonstration of their robot, which was engineered to scale a wall and maneuver over obstacles in a competition setting.

The team most recently participated in the 17th annual Long Island Regional FIRST Robotics Competition — alongside more than 2,000 students from 50 high schools. The event was held at Hofstra University.

ROBOTICS TEAM HONORED - Members of the Port Jefferson Robotics Team members were recognized by the Port Jefferson School District's Board of Education on May 10th.
